

OMX 312UNI

Digital DIN rail mounted signal converter

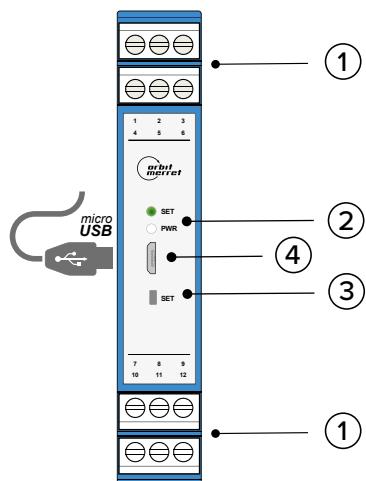

MULTIFUNCTION INPUT (DC, PM, RTD, T/C, DU)

Note

There is galvanic connection between USB connector and input!
In case you need to configure the unit while the input signal is connected, the use of a galvanic isolated OM USB-ISO convertor is recommended..

- Multifunction input (DC, PM, RTD, T/C, DU)
- Configurable type and measuring range
- 2x Analogue output, passive/active
- Quick configuration by DIP switch
- PC configurable via USB port
- Excitation 24 VDC
- Galvanic isolation 2.5 kVAC
- Simple instalation to DIN rail

DANGER	WARNING
HAZARD OF ELECTRICAL SHOCK - Disconnect all power and other supply lines before servicing equipment Failure to follow this instruction may result in death or serious injury.	EQUIPMENT OPERATION HAZARD - Do not use this product in safety critical system - Do not disassemble, repair or modify this product - Do not operate beyond the recommended operating environment Failure to follow these instructions may result in death, serious injury, or equipment damage.
Electrical equipment should be installed, operated, serviced, and maintained only by qualified personnel. No responsibility is assumed by ORBIT MERRET for any consequences arising out of the use of this device.	

2 Connection

CONNECTION

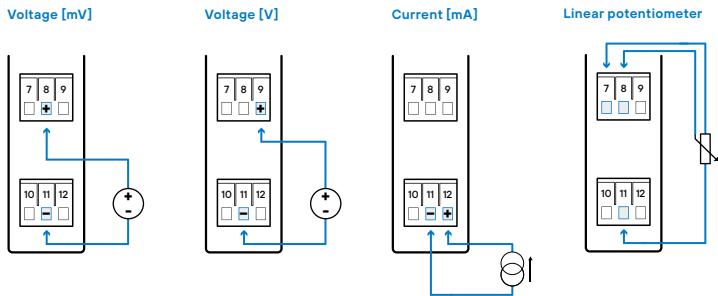

TYPE	INPUT U1	INPUT U2	INPUT I
DC	±60/±75/±100/±150 mV ±300/±1000mV	±20/±40V	±100 mA
PM		±2/±5/±10 V	0..5/20 mA, 4..20 mA
OHM	0..0.1/0.3/1/3/10/30/100/300 kΩ		
Pt	Pt 50/100/500/1000		
Cu	Cu 50/100		
Ni	Ni 1000 / 10000

1.5 Nm	—	Ø 3.5 mm	0.14 in
13.2 lb-in			

Note

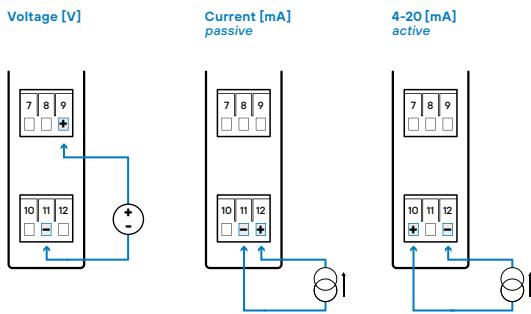

Contactors, high power electric motors, frequency drives and other power devices should not be in a close proximity of the meter. Input signal leads (measured value) should be separated from all power lines and power devices. Even though the device has been designed and tested according to standards for industrial environment, we strongly advise to adhere to the above presented rules.

Input wiring diagram for type DC and DU

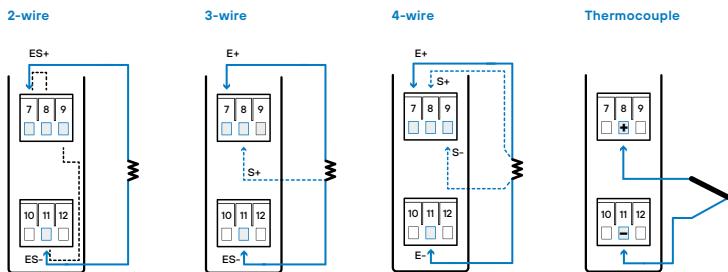

RANGE	DC
0...60/75/100/150/300mV 0...1000 ±60/±75mV ±100/150/300mV ±1000	Input 1 8
0...20/±40V ±20/±40V	Input 2 9
0...100 mA ±100 mA	Input 3 12

Input wiring diagram for type PM

RANGE	PM
Passive 0...5/20 mA ±5/±20 mA 4...20 mA	Input 3 12

Analogue input range setting, TEACH-IN

- by a long press (>2s) of the **SET** button enter the configuration mode - LED **PWR** yellow and LED **SET** turquoise
- connect the signal of the desired value for the minimum of the range **RNG.MIN.** to the input of the converter (for example 5 mA)
- by a long press (>2s) of the **SET** button this value is set - LED **PWR** yellow, LED **SET** purple
- connect the signal of the desired value for the maximum of the range **RNG.MAX.** to the input of the converter (for example 19,5 mA)
- by a long press (>2s) of the **SET** button this value is set - LED **PWR** yellow, LED **SET** green
- by a short press of the **SET** button return to the standard working mode - LED **PWR** green

Setting of **Analogue input TEACH-IN** is active only when DIP switches No. 1-5 are in the "0" position, i.e. **Setting via OM Link**

Tare settings

- by a short press of the **SET** button enter configuration of Tare - LED **PWR** white and LED **SET** turquoise
- by a long press (>2s) of the **SET** button set the current value of Tare - LED **PWR** white, LED **SET** green
- by a short press of the **SET** button return to the standard working mode with active Tare - LED **PWR** green, LED **SET** white

Minimum range of **Analogue output** for U/I inputs signals is pre-set as unipolar, i.e. "0/VmA" or "4 mA". If required, it is also possible to enter a negative value of the maximum in the minimum, i.e. zero will be in the middle of the selected range.

A short press at any time during the calibration will end the calibration without saving. After one minute of inactivity, the calibration is terminated without saving and both LEDs return to the basic state

INSTRUMENT SPECIFICATIONS

TC	50 ppm/°C
Accuracy	±0.1% of the range (for 20 meas./s) ±0.15 % of the range (OHM - 100k/300k)
Rate	1...100 measurements/s
Overload capacity	10x (t < 30 ms), 2x
Compensation of conduct	max. 30 Ω (RTD)
Measurement accuracy CJC	±1.5°C (T/C)
Functions	Teach-in, Tare, Math functions, Simulation
Digital filters	exponential / floating / arithmetic average, rounding
Math functions	polynomial / inverse polynomial / logarithm / exponential / power / root
Linearization	linear interpolation in 100 points (only via OM Link)
OM Link	company communication interface for operation, setting and update of instruments. (microUSB)
Watch-dog	reset after 500 ms
Calibration	at 25°C and 40 % r.h.

ANALOGUE OUTPUTS

No. of outputs	2
Type	isolated, configurable with a resolution of 10 000 parts, type and range are selectable in the menu
Non-linearity	0.1 % of FS
TC	15 ppm/°C
Rate	response to change of value < 3.5 ms
Ranges	0...10 V, 10...0 V resistive load < 2.6 kΩ 0...20 mA/20...0 4...20/20...4 mA (active/passive) compensation of leads' resist. < 600 Ω/12 V

EXCITATION

Fixed voltage	24 VDC/35 mA, isolated
---------------	------------------------

POWER SUPPLY

Power	10...30 VDC/24 VAC, ±10 %, 2.5 VA, PF≥ 0.4, $I_{\text{sp}} < 40 \text{ A}/1 \text{ ms}$, isolated - fuse inside (750mA)
-------	--

MECHANIC PROPERTIES

Material	PA66, incombustible UL 94 V-0, blue
Dimensions	114.5 x 99.0 x 17.5 mm
Installation	to DIN rail 35 mm wide

OPERATING CONDITIONS

Connection	connector terminal blocks, section < 2.5 mm ²
Stabilization period	within 5 minutes after switch-on
Working temperature	-20°...60°C
Working humidity	< 95 % r.h., non condensing
Storage temperature	-20°...85°C
Protection	IP20
Construction	safety class I
El. safety	EN 61010-1, A2
Dielectric strength	2.5 kVAC for 1 min. between power supply and signal input 2.5 kVAC for 1 min. between signal input and outputs 2.5 kVAC for 1 min. between outputs
Insulation resist.*	for pollution degree II, measurement cat. III power supply > 300 V (Pi), 255 V (Di) Input/outputs > 300 V (Pi)
EMC	EN 61326-1 (Industrial area)
Seismic qualification	IEC/IEEE 60980-344 Edition 1.0, 2020, par. 6, 9
Mechanical resistance	EN 60068-2-6 ed. 2:2008
