1. CONTENTS

2. INSTRUMENT DESCRIPTION

DESCRIPTION

The OM 36 model series are simple 3 1/2 digit panel instruments, which are manufactured in the following alternatives:

DC	DC voltmeter/ammeter
AC	AC voltmeter/ammeter
PM	Process monitor
OHM	Ohmmeter
RTD	Thermometer for sensors Pt 100

The instrument is based on a simple converter, which secures high accuracy and stability.

ADJUSTABLE DISPLAY PROJECTION

Setting	by potentiometers under the front panel (in the range of approx. ±10 %)
Projection	±1999

OPERATION

The instrument is designed for simple measurement without further control.
Placement of the decimal point is selectable by shorting link under the front panel.

EXTENSION

Excitation is suitable for feeding of sensors and transducers. It has a galvanic isolation with continuously adjustable value in the range of 2...24 VDC.
Analogue outputs will find their place in applications where further evaluating or processing of measured data in external devices is required. We offer several types of current or voltage non-isolated outputs. The value of analogue output corresponds with the input signal.

3. CONNECTION

The supply lead for feeding the instrument should not be in the proximity of low-potential signals.
Contactors, motors with larger input and other efficient elements should not be in the proximity of the instrument.
The lead into the instrument input (the measured quantity) should be in sufficient distance from all power leads and appliances. Provided this cannot be secured, it is necessary to use shielded leads with connection to ground.
The instruments are tested in compliance with standards for use in industrial area, yet, we recommend to abide by the above mentioned principles.

4.1 CHANGE OF PROJECTION ON THE DISPLAY

The measuring range and projection of the display are set from manufacture pursuant to customer requirements stated in the order form for which the manufacturer declares validity of the catalogue technical parameters.

Under certain conditions, i.e. the expertise and technical equipment, the change in instrument parameters may be performed pursuant to the following procedure.
